

Dear Hiring Manager,

My name is Jingyu He, and I am a student at George Brown College studying Computer Programming and Analysis. I am writing to apply for a Software Developer position.

I have experience working with Java, Python, and JavaScript. I have built several projects, including a web scraper, a chatbot, and a banking application. Through these projects, I learned how to solve problems, write clean code, and build simple web applications.

I am a fast learner and I enjoy working in a team. I also have work experience in customer service, which helped me improve my communication and teamwork skills. I am confident that I can bring a positive attitude and strong work ethic to your team.

I am very interested in this opportunity and would love to continue learning and growing as a developer. Thank you for your time and consideration.

Sincerely,

Jingyu He
